

Naziv Artina potječe od lokalnog lastovskog naziva za gregulu, koja je ujedno i endem Sredozemlja.
 / The name Artina is derived from the local dialect of Lastovo's island for Yelkouan Shearwater which is also the endemic species of the Mediterranean.

Projekt LIFE Artina

Mreža za očuvanje morskih ptica u Jadranu
 Seabird Conservation Network in the Adriatic

JESTE LI IH VIDJELI?

HAVE YOU SEEN THEM?

GREGULA
YELKOUAN SHEARWATER

PUFFINUS YELKOUAN

KAUKAL
SCOPOLI'S SHEARWATER

CALONECTRIS DIOMEDEA

SREDOZEMNI GALEB
AUDOUIN'S GULL

LARUS AUDOUINII

BROJNOST PAROVA / NUMBER OF PAIRS

300-400

1200-1750

13-60

RASPON KRILA / WINGS SPAN

70 - 84 cm

112 - 122 cm

117 - 128 cm

PRIJETNJE / THREATS

- Predacija crnih štakora na gnijezdeće populacije
- Kompeticija galeba klukavca i sredozemnog galeba
- Slučajan ulov morskih ptica u ribolovni alat
- Negativan utjecaj posjetitelja i turista na gnijezđenje
- Morski otpad
- Nedostatak podataka
- Nedostatak kapaciteta za upravljanje
- Predation on nesting bird populations by ship rats
- Interspecific competition of Yellow-legged Gull and Audouin's Gull
- Seabird bycatch in fishing gears
- Negative impact of visitors and tourists on nesting
- Marine litter
- Lack of data
- Lack of management capacity

Kako Vi možete pridonijeti zaštiti morskih ptica? / How can you contribute to the protection of seabirds?

Nemojte se približavati i stvarati buku u blizini gnijezdecih kolonija.

Nemojte izlaziti na otoke koji nisu predviđeni za turističke izlete.

Ukoliko primijetite gnijezda ptica, udaljite se što prije. Nemojte uzimati jaja ptica.

U blizini kolonija koristite što manje svjetla. Čuvajte prirodu i otpad odlažite u za to predviđene spremnike.

Do not approach and make noise near the nesting colonies. -Do not visit islands that are not designated for tourist excursions. If you notice bird nests, move away from them as soon as possible.

Do not take birds' eggs. Use as little light as possible near the colonies.

Protect nature, dispose waste in the designated containers.
